

Automated 1632 GOLD “3 in 1” Input Shaft Grinder for Export to India

TRW Automotive.....selects **Weldon** to satisfy demand for grinding steering gear components. Weldon’s 3 in 1 process for power steering input shaft grinding allows the end user to grind longitudinal slots to a precise width, grind the major OD to size under gage control, and C-axis grind the metering edges in one continuous cycle. This results in consistent quality with an OD size tolerance of +/- .0025mm and a total cycle time under 75 seconds.

System features:

Fanuc 6-axis robot, **Renishaw** radial probe, **Marposs** automatic wheel balancer, **Marposs** in-process sizing gage, **Fanuc** 310i TA CNC control, **GMN** high frequency vertical grinding spindle, **Dittel** acoustic emissions sensor, **Heidenhain** linear and rotary glass scales

FANUC
Robotics

Authorized
System
Integrator

Weldon Solutions offers a full line of CNC OD, ID, and combination grinders. As a Fanuc Robotics integrator Weldon can also address your machine tending, material removal, material handling, and packaging/palletizing needs.

QUALITY, Over and over again
